Environmental Science, Sustainability and Renewable Energy (BE04000101)

MODULE 1

1) What are the components of environment? Explain by drawing sketch.
2) Explain the impact of technology and development on environment.
3) Give the composition of atmosphere.
4) Explain the importance of environmental education. Discuss the impact of human on environment.
5) Write a short note on environmental degradation.
6) List principles and scope of environmental science and explain anyone in detail.

MODULE 2

1) Enlist different types of environmental pollution.
2) Explain effects of water pollutants on environment and human.
3) Write a short note on Eutrophication.
4) Discuss various water quality parameters for safe drinking water.
5) Classify the impurities present in water and describe the methods of controlling water pollution.
6) Define air pollution. Give the classification of air pollutants.
7) Enumerate different primary and secondary air pollutants and explain the effect of carbon monoxide on human beings.
8) Explain effect of air pollution on human beings and animals.
9) Discuss the effects of noise pollution and its control.
10) Explain sources of noise pollution.
11) Explain the factors affecting municipal solid waste generation.
12) Describe briefly various methods of collection of solid waste.
13) Give classification and sources of bio medical waste.
14) Enlist different methods of treatment and disposal of biomedical waste and describe incineration.
15) What is E-waste? What are the reasons for faster e-waste generation rate in the world?
16) Classify E-Waste and explain methods of e-waste management.

MODULE 3

1. Explain by drawing sketch: Greenhouse effect
2. Explain: Ozone layer depletion.
3. What is global warming? What are the impacts of global warming? Write various measures to reduce global warming.
4. Write a short note on: Sustainable Development
5. Write a short note on: Acid rain
6. What is green building? Explain concept of green building.
7. Explain various benefits of green building.
8. Explain principles and applications of 4 R's.
