CE, IT, & CSE Department

Computer Organization & Architecture (BE04000251)

Question Bank

S. No.	Question	Marks	CO
1	Explain functional units of a digital computer with neat block diagram.	7	CO1
2	Describe Von Neumann architecture and list its limitations.	7	CO1
3	Convert decimal number into IEEE-754 floating point format.	7	CO1
4	Explain fixed point and floating point number representation.	4	CO1
5	Explain parity bit and Hamming code.	7	CO1
6	Explain different types of computer buses.	4	CO1
7	Define Register Transfer Language (RTL) with example.	4	CO2
8	Explain arithmetic micro-operations with examples.	7	CO3
9	Explain logic micro-operations.	4	CO3
10	Explain shift micro-operations.	4	CO3
11	Explain bus transfer using tri-state buffers.	7	CO2
12	Explain instruction cycle with neat flowchart.	7	CO2
13	Explain instruction codes and computer registers.	7	CO2
14	Explain input–output and interrupt cycle.	7	CO2
15	Draw and explain block diagram of basic computer.	7	CO3
16	Explain timing and control unit.	4	CO2
17	Write assembly language program to add two 8- bit numbers.	7	CO2
18	Write assembly program to find factorial of a number.	7	CO2
19	Explain machine language and assembly language.	4	CO2
20	Explain subroutines and their advantages.	4	CO2
21	Explain microprogrammed control unit with block diagram.	7	CO3
22	Compare hardwired and microprogrammed control.	4	CO3
23	Explain microinstruction format.	4	CO3
24	Explain different addressing modes with examples.	7	CO2
25	Explain stack organization with neat diagram.	7	CO2
26	Compare RISC and CISC architectures.	7	CO5
